Read the given passage and answer the question that follows.

We have a book of philosophy from antiquity filled with strategies to counter dogmatic tendencies, whether in ourselves or in other people. This book makes one laugh out loud with questions about whether we knew that grass is green, that some tattoos are deadly, or if it is wrong for parents to tattoo their babies. The French writer Michel de Montaigne read this book in the 16th century and used the strategies in his essay 'An Apology for Raymond Sebond'. Through Montaigne, many European Enlightenment philosophers came to see a link between scepticism and toleration. Plato's Republic is more renowned, but the book from antiquity that people ought to read right now is Sextus Empiricus' Outlines of Pyrrhonism.

Sextus was a physician who wrote in Greek and lived in the 2nd or 3rd century CE. He worked in a tradition that originated with the Greek philosopher Pyrrho, a contemporary of Aristotle. Outlines of Pyrrhonism, according to the Stanford Encyclopaedia of Philosophy, is 'the best and fullest account we have of Pyrrhonism, scepticism'. The sceptical way of life, on Sextus' presentation, follows a certain rhythm. You feel puzzlement about something. You search for knowledge about it. You arrive at two equally weighty considerations about what is happening. You let go trying to find an answer. And once you recognise that you might not find a thing, it brings some mental tranquillity.

Central objection to scepticism is that one cannot live a recognisably human life and doubt the existence of real objects or moral criteria. In his book Sextus, Montaigne, Hume, Pyrrhonizers (2021), the philosopher Ribeiro reveals how sceptics throughout history have responded to this charge. Sceptics acknowledge that man beings perceive things with their senses, feel bodily impulses, learn useful skills, and follow laws of nature. Sceptical philosophers make different 'sceptical cartographies' – that is, maps of the boundary of sceptical doubts and the bedrock of human life that repels doubt. Sceptics work for a living, in family and community life, and can be as kind and generous as anyone else. What sceptics avoid is making claims about the nature of reality beyond how things appear to them. Few of Sextus' modes to undermine certainty in yourself and others.

Identify yourself in the school of thought associated with a preeminent person, for example Sir

attempting this Question.

A question is given, followed by two statements labelled I and II. Identify which of the statements is/are sufficient/necessary.

Question:
Let p be the total number of males and q be the total number of females in a family. What is the difference between P and q ?

Statement:
I. Vipraja has six daughters, who have a brother. Vipraja is the wife of Shantanu.
II. Shantanu is the father of six daughters. Kiran's mother Vipraja is married to Shantanu. Kiran is a male.

Either statement I alone or statement II alone is sufficient.
 Statement I alone is sufficient.
 Both statements I and II together are necessary.
 Statement II alone is sufficient.

Given below is a paragraph with five sentences, which are presented in a jumbled order. Write down the best order (e.g. ABCDE) which would form a meaningful, unified, and coherent paragraph.

A. We need to listen and act upon what birds are telling us, as they disappear ever faster of about 11,000 species of bird spanning the globe, the populations of half of them are falling, while just 6% are increasing.
B. Birds truly are the canary in the coal mine – as indicators for the health of our planet, given their sensitivity to ecosystem changes, their ubiquity around the planet, and how well studied they are.
C. Conservation efforts have been successful at rescuing individual species in specific locations from the brink, but political will and funding are needed to reverse the global decline.
D. Bird populations are affected by all the damage caused by human activity, from the destruction of wild habitat, the climate crisis, and pesticides and other pollution, to over-hunting and impacts of alien species and disease.
E. Billions of birds have been lost in recent decades in North America and Europe alone, and while there are more species in the tropics, a higher proportion are at risk of extinction in temperate and largely richer nations.

For the four-sentence (S1 to S4) paragraph below, sentences S1 and S4 are given. From the options P, Q, R, and S choose the appropriate sentences for S2 and S3, respectively.

S1. Placebos are essential to the design of reliable clinical trials.
S2. _____
S3. _____
S4. "Red, yellow, and orange are associated with a stimulant effect, while blue and green are related to a tranquilizing effect", says Dr A. J. de Craen.

P. Such studies have found that even the colour of pills made a difference in the placebo results.
Q. Their once-surprising effect on participants has become the focus of many studies.
R. Another argument says that by prescribing a placebo to placate a patient, the correct diagnosis of a serious ailment might be postponed.
S. At one time, placebos were only used in experiments as a control.
